DETAILED ACTION

1. Applicant's explanation has cleared confusion regarding the translation of the operation of this document. A non-final rejection follows.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 14,15, and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 lacks antecedent, as the "means for actuating" appear to be the same "means for moving" of claim 11. If applicant traverses this rejection, a full explanation of each of the various means of claim 11 and 14 is required, detailing their differences.

Claim 17 appears to be incorrect as the connecting rod (40a,b) does not appear to operate on the articulated second bar (sic: arm) (20,22).

Information Disclosure Statement

4. The information disclosure statement filed 10/17/2005 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the foreign information referred to therein has not been considered.

Specification

5. The substitute specification of 10/17/2005, with a statement of no new matter, and a marked up copy of 9/26/2007, is entered.

Double Patenting

6. Claims 20, 21, 22, 23, 24 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 11, 13, 16, 18, and 19. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Applicant has attempted, unsuccessfully, to characterize these sets of claims as combination and subcombination. However, the preamble is not limiting *Kropa v. Robie and Mahlman* 88 USPQ 478 (CCPA 1951), and both sets require the combination roof structure in the body of the claim.

Allowable Subject Matter

7. Claims 11-13, 16, 18, and 19 are allowed.
8. Claims 14-15, and 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3612

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wagner is deemed to be the closest art of record to the proffered claims, but lacks the claimed abutment of stop means and roof formation as claimed. Remaining references detail further laterally movable shelf structure.
